

Jayavasanth Ramesh (JV)

Seattle, WA

[linkedin.com/in/jvr-seattle](https://www.linkedin.com/in/jvr-seattle) | github.com/nallathor-veenai

Engineering leader who builds **0-to-1 products** and ships at scale. Led Alexa's GenAI transformation—**voice-first Gen AI experiences** to **1M+ users**. I partner with PMs and senior engineers to align VPs on strategy, then execute with **cross-org teams** under tight deadlines. Track record: **scaling teams** (4→13), **developing talent** (7 promotions incl. SDE3), **\$120M** annual impact via **systems integration** and **operational efficiency**.

CORE EXPERTISE

AI/ML: LLMs, RAG systems, NLP, classifiers, normalizers, semantic search, prompt engineering, conversational AI, voice interfaces

Leadership: 0-to-1 product delivery, team scaling, cross-org partnerships, strategic roadmapping, talent development (7 promotions), **250+** interviews

Technical: AWS (Lambda, Step Functions, DynamoDB, Glue, S3, SNS, SQS) | Microservices, ETL | Elasticsearch, vector DBs | Python, C++, Java, TypeScript, React Native

EXPERIENCE

Software Development Manager, Books and Classical Music in Alexa — Amazon | 2020 – 2025

Innovation with AI: Building GenAI Experiences on Alexa+ (2024 - present)

- **0-to-1:** Built E2E voice integration for Books—discoverability, playback, GUI features, Q&A—from inception to launch; modernized **4-year-old** SDK for Audible to suit Alexa+
- Scaled genAI voice features to **~1M+** users ; Built ML classifiers and LLM-based normalizers for Classical Music semantic search (**100k+** users)
- Shipped headlining features under tight deadlines for Amazon Device Day—E2E from device firmware to **12+** backend microservices
- Hand-built multi-service log analyzer to identify customer defects (dev tooling), secured funding, iterated with the team —reduced oncall load **30%**

Leading Cross-Org Platform Transformations (2022 - 2024)

- Led Books Skills Kit—unified Audio platform for Books (merger of **20+ microservices** across 3 orgs) with phased roll outs for feature cohesion and operational efficiency
- Authored strategy doc with Sr/Principal Engineers and PMs; **secured alignment across Directors and VPs**
- Created multi-year roadmap; served as **lead manager** for **23** engineers across **3** orgs; managed **13** directly
- Delivered seamless integration with no CX impact to **100M** Alexa Audio platform (Music, Podcast, Radio)
- Shut down **8+** microservices, reduced **6 HC** ops burden → **\$120M** annual contribution profit (**2.2M** users)

Manager Transition and building voice first experiences for Kindle (2020-2022)

- Scaled team **4→13**; promoted **6 SDE1→SDE2** and **1 SDE2→ Sr. SDE** (3+ year development arc)
- Owned Kindle Assistive Reader E2E: improved TTS (NLP), led AWS migration for services, converted **3** services to **full CI/CD**
- Built ETL pipelines (AWS Glue) for listening metrics; text extraction for machine narrated audiobooks (**50k/year**, **\$1.5M** ARR)
- Built E2E metrics dashboards; automated sprint/ticket workflows—**200k** daily users

Software Development Engineer I & II — Amazon | 2015 – 2020

- Built multi-platform tools (Web, Kindle, Mac, Windows) for layout and text rendering engines
- Developed real-time features for Lambda@Edge (**~4.5M TPS**); performance optimization at global edge
- Designed MathML rendering (C++); contributed to cross-platform frameworks in C++, Java, JavaScript

EDUCATION

B.S. Computer Science and Engineering | College of Engineering, Guindy, Chennai, India | 2011–2015 | Honors
