

Jayavasanth Ramesh (JV)

[linkedin.com/in/jvr-seattle](https://www.linkedin.com/in/jvr-seattle) | Seattle, WA

Engineering leader who builds **0-to-1 products** and ships at scale. Led Alexa's GenAI transformation—**voice-first Gen AI experiences to 1M+ users**. I partner with PMs and sr. SDEs to establish strategic goals and execute them with **cross-org teams** under tight deadlines. Track record: **scaling teams** (4→13), **developing talent** (7 promotions incl. Sr.SDE), **\$120M** annual impact via **systems integration** and **operational efficiency**. I'm energized by shipping customer-facing products and developing the engineers who build them.

CORE EXPERTISE

AI/ML: LLMs, RAG systems, NLP, classifiers, normalizers, semantic search, prompt engineering, conversational AI, voice interfaces

Leadership: 0-to-1 product delivery, team scaling, cross-org partnerships, strategic roadmapping, talent development (7 promotions), **250+** interviews

Technical: AWS (Lambda, Step Functions, DynamoDB, Glue, S3, SNS, SQS) | Microservices, ETL | Elasticsearch, vector DBs | Python, C++, Java, TypeScript, React Native | Multi-platform(Web, Kindle, Mac, Windows) tool building

EXPERIENCE

Software Development Manager, Books and Classical Music in Alexa — Amazon | 2020 – 2025

Innovation with AI: Building GenAI Experiences on Alexa+ (2024 - present)

- Led **0-to-1** E2E voice integration for Books LLM based Alexa+ —discoverability, playback, GUI features, Q&A (RAG-based)—from inception to launch; modernized **4-year-old** SDK for Audible to suit Alexa+
- Scaled genAI voice features to **~1M+** users ; Built ML classifiers and LLM-based normalizers for Classical Music entity search (**100k+** users, **5.3M** records)
- Shipped headlining features under tight deadlines for Amazon Device launch event on Sept '25 —E2E from device firmware to **12+** backend microservices
- Dev Tooling : Took an organization initiative to build a multi-service log analyzer with LLM resulting in oncall load reduction by 30%. Rolled out to 200+ internal devs

Leading Cross-Org Platform Transformations (2022 - 2024)

- Led Books Skills Kit—unified Audio platform for Books (merger of **20+ microservices** across 3 orgs) with phased rollouts for feature cohesion and operational efficiency
- Authored **multi-year tech roadmap for three teams**; secured alignment across Directors and VPs to execute
- Served as **lead manager** for **23** engineers across **3** orgs; managed **13** directly
- Delivered seamless integration with no impact to **100M** Alexa Audio users across Music, Podcast, Radio
- Sunset **8+** microservices, reduced **6 HC** ops burden, increased annual Contribution Profit by **\$2M**

Manager Transition and building voice-first experiences for Kindle (2020-2022)

- Scaled team **4→13**; promoted **6 SDE1→SDE2** and **1 SDE2→Sr.SDE**
- Owned Kindle Assistive Reader on Alexa E2E - **200k** daily users; Improved Text-To-Speech narration quality, led AWS migration for services, converted **3** services to **full CI/CD**
- Built ETL pipelines (AWS Glue) for listening metrics;
- Built core text extraction tech for generating machine narrated audiobooks (**50k/year**, **\$1.5M** ARR)

Software Development Engineer I & II — Amazon | 2015 – 2020

- Built multi-platform tools (Web, Kindle, Mac, Windows) to help book publishers ; Built E2E metric dashboards
- Developed real-time features for Lambda@Edge (**~4.5M TPS**); performance optimization at global edge
- Designed MathML rendering on Kindle; contributed to layout and text rendering engines

EDUCATION

B.S. Computer Science and Engineering | College of Engineering, Guindy, Chennai, India | 2011–2015 | Honors
